

DNA – Distribution network for investment products

Distribution is in our DNA. Our distribution network gives investors in the EU/EEA and Switzerland access to your products.

How does it work? Very simply: Your funds are included in our open distribution agreements with more than 25 of the leading banks and distribution platforms. You remain in control and can focus your resources on asset management.

- ✓ **One contracting party:** No negotiations with distribution partners. No contract management.
- ✓ **Full cost control:** Choose channels flexibly and benefit from our preferential terms.
- ✓ **Commission management?** We take care of it.
- ✓ **Know-Your-Distributor:** Full transparency on our monitoring activities.
- ✓ **Benefit from scale:** Your funds can also be traded via our partners' sub-distributors.

DNA – Your solution for Europe

MAXIMUM EFFICIENCY – FULL MARKET ACCESS!

DNA – Distribution network for investment products

DNA is suitable for asset managers of every size. Whether you have just launched your fund and are pursuing your first AUM target, or you are already established in the market and would like to outsource certain tasks.

EFFECTIVE With one agreement, you gain access to our steadily growing network. We take care of contract management with distribution partners, due diligence, and the calculation and payment of distribution commissions. This gives you more time for your strategy.

INDIVIDUAL With Reuss at your side, you receive an individual and sustainable distribution solution. We are happy to advise you and implement the right strategy for you and your funds.

FLEXIBLE You choose distribution channels and markets – and can adjust them flexibly at any time. Do you have a distribution partner in mind that is not yet in our network? We take over the contract negotiations and set them up. Upon request, exclusively for you.

TRANSPARENT Stay on top of everything with holdings reports, KYD results, information on distribution network expansions, commission statements and much more.

DNA – Your solution for Europe
